

UNITED ENGINEERING GROUP

Contracting and Supplying

INTRODUCTION

We are a group of Egyptian engineers with an extensive experience in the field of civil engineering and construction

We have proficient skills in construction project management and planning

UEG can provide unique product/services to our clients.

We at UEG aim to apply the cutting-edge technologies of management and planning , stemming from our long experience in the field, to the construction industry in order to open the gate for the innovation in the construction field.

MISSION

- **TO PERFORM** for our customers the highest level of quality in construction services with market competitive prices using the modern technology tools in construction and finishing works.
- **TO STRIVE** to implement a long-term business relation with our clients, based on respect, and the anticipation of their needs.
- **TO MAINTAIN** the highest levels of professionalism, integrity, honesty, and fairness in our relationships with our employees, suppliers, and subcontractors.

OUR KEY VALUES

We consider it critical for us that we work in accordance with these values to maintain our reputation and our relationship of trust with our clients.

HEALTH & SAFETY

- Health and safety are among the first considerations of any project.
- Identification of an adherence to safe work practices to be followed during work and until completion.
- Making Health, Safety, and hygiene an integral part of the management and business performance of our company.
- Compliance with current and future applicable Health and Safety Legislation.
- Allocating sufficient resources as required for the implementation of the safety plan.
- Working in conjunction with the professional Quality, Safety and Environmental Advisors where necessary.

QUALITY

- Provide the highest quality level of civil engineering works, construction process and services according to our strategy and also with an economical manner.
- Set clearly defined quality objectives, plans and targets that are regularly audited and reviewed by senior management.
- Delivering a high-quality product and service with due regard for all environmental issues.
- Implementation of an effective documented quality system to ensure and demonstrate compliance with required standards in all contracts.

OUR KEY VALUES

ENVIRONMENT

- Compliance with the requirements of current and future applicable Environmental Legislation, Approved Codes of Practice, and industry recognized guidelines/standards.
- Reduce of the environmental impact due to emissions for air, land, water, and noise from our operations with continual improvement.
- Controlling, preventing, and seeking to minimise the level of pollution in all areas of work.
- All employees to report any accidental spillage to their supervisors/site supervisors to ensure that all employees are provided with the waste management plan where required.

ETHICS

- Trade, compete fairly and must obtain business through fair and legal practice.
- Not tolerate any member of the company offering or being offered, any form of bribe or inducement.
- Report financial information in a clear, complete, accurate, honest, and timely manner.
- Treat our customers, suppliers, and stakeholders as we would wish to be treated.
